Chronicles

Chronicles, a multipurpose ghost theme, is perfect for building online publications, personal blogs & journals.

Demo : http://chronicles.arban.co

Folder Structure

The root directory contains the following files and folders -

- **assets**
  - **src** - It containes the source javascript and scss files, which gets compiled to the `built` directory.
  - **built** - It contains the compiled css and js.
  - **img** - Containes the images.
- **dist** - This directory is generated by the `$ yarn build` command and contains the theme's zip file.
- **partials** - This directory contains the partials used in the theme
- `default.hbs` - The main template file
- `home.hbs` - The template used on the landing page
- `index.hbs` - The template used as the index
- `post.hbs` - Used for individual posts
- `page.hbs` - Used for individual pages
- `tag.hbs` - Used for tag archives
- `author.hbs` - Used for author archives
- `error.hbs` , `error-404.hbs` - Used for the error pages
- `package.json`

Development

The theme uses gulp and nodejs for the development purposes. You'll need Gulp and Nodejs installed globally. After that from the theme's root directory run the following commands.

```
$ yarn install
$ yarn dev
```

Now you can edit scss and js files in `/assets/src/`, which will be compiled to `/assets/built/` automatically.

The `build` Gulp task minifies all the css and js files and packages the theme files into `dist/<theme-name>.zip`, which you can then upload to your site.

```
$ yarn build
```

Adding Posts to Editor's Pick

To add a post in the editors pick section, you need to add the following internal tag to the post - `#editors-pick`

Note: Editors Pick section will remain invisible if it has no posts.

Activating Search

To make search functional, you need to add your "Ghost Content API Key" in the default.hbs file (A variable is left blank for the key).

Social Media Icons

Social media links are placed at two main components - Footer.hbs & Author.hbs. Social icons for facebook and twitter are already implemented in the theme. To activate icons for other social networks, just insert the following code snippets in the respective files.

Footer.hbs

1. **500px**

```
<a href="" target="_blank">
  {{> "icons/500px"}}
</a>
```

2. **Dribbble**

```
<a href="" target="_blank">
  {{> "icons/dribbble"}}
</a>
```

3. **Facebook**

```
<a href="" target="_blank">
  {{> "icons/facebook"}}
</a>
```

4. **Github**

```
<a href="" target="_blank">
  {{> "icons/github"}}
</a>
```

5. **Instagram**

```
<a href="" target="_blank">
  {{> "icons/instagram"}}
</a>
```

6. **Linkedin**

```
<a href="" target="_blank">
  {{> "icons/linkedin"}}
</a>
```

7. **Medium**

```
<a href="" target="_blank">
  {{> "icons/medium"}}
</a>
```

8. **Pinterest**

```
<a href="" target="_blank">
  {{> "icons/pinterest"}}
</a>
```

9. **Reddit**

```
<a href="" target="_blank">
  {{> "icons/reddit"}}
</a>
```

10. **RSS**

```
<a href="" target="_blank">
  {{> "icons/rss"}}
</a>
```

11. **Tumblr**

```
<a href="" target="_blank">
   {{> "icons/tumblr"}}
</a>
```

12. **Twitter**

```
<a href="" target="_blank">
   {{> "icons/twitter"}}
</a>
```

13. **Youtube**

```
<a href="" target="_blank">
   {{> "icons/youtube"}}
</a>
```

Author.hbs

1. **500px**

```
<a class="link-with-svg" href="" target="_blank" rel="noopener">
    <span class="link-svg">
    {{> "icons/500px"}}
    </span>
    <span class="link-text">500px</span>
</a>
```

2. **Dribbble**

```
<a class="link-with-svg" href="" target="_blank" rel="noopener">
    <span class="link-svg">
    {{> "icons/dribbble"}}
    </span>
    <span class="link-text">Dribbble</span>
</a>
```

3. **Facebook**

```
<a class="link-with-svg" href="" target="_blank" rel="noopener">
    <span class="link-svg">
            {{> "icons/500px"}}
    </span>
    <span class="link-text">500px</span>
</a>
```

4. **Github**

```
<a class="link-with-svg" href="" target="_blank" rel="noopener">
    <span class="link-svg">
                {{> "icons/github"}}
    </span>
    <span class="link-text">Github</span>
</a>
```

5. **Instagram**

```
<a class="link-with-svg" href="" target="_blank" rel="noopener">
    <span class="link-svg">
    {{> "icons/instagram"}}
    </span>
    <span class="link-text">Instagram</span>
</a>
```

6. **Linkedin**

```
<a class="link-with-svg" href="" target="_blank" rel="noopener">
    <span class="link-svg">
    {{> "icons/linkedin"}}
    </span>
    <span class="link-text">Linkedin</span>
</a>
```

7. **Medium**

```
<a class="link-with-svg" href="" target="_blank" rel="noopener">
    <span class="link-svg">
    {{> "icons/500px"}}
    </span>
    <span class="link-text">500px</span>
</a>
```

8. **Pinterest**

```
<a class="link-with-svg" href="" target="_blank" rel="noopener">
    <span class="link-svg">
    {{> "icons/pinterest"}}
    </span>
    <span class="link-text">Pinterest</span>
</a>
```

9. **Reddit**

```
<a class="link-with-svg" href="" target="_blank" rel="noopener">
    <span class="link-svg">
                {{> "icons/reddit"}}
    </span>
    <span class="link-text">Reddit</span>
</a>
```

10. **RSS**

```
<a class="link-with-svg" href="" target="_blank" rel="noopener">
    <span class="link-svg">
                {{> "icons/rss"}}
    </span>
    <span class="link-text">RSS</span>
</a>
```

11. **Tumblr**

```
<a class="link-with-svg" href="" target="_blank" rel="noopener">
    <span class="link-svg">
                {{> "icons/tumblr"}}
    </span>
    <span class="link-text">Tumblr</span>
</a>
```

12. **Twitter**

```
<a class="link-with-svg" href="" target="_blank" rel="noopener">
    <span class="link-svg">
                {{> "icons/twitter"}}
    </span>
    <span class="link-text">Twitter</span>
</a>
```

13. **Youtube**

```
<a class="link-with-svg" href="" target="_blank" rel="noopener">
    <span class="link-svg">
    {{> "icons/youtube"}}
    </span>
    <span class="link-text">Youtube</span>
</a>
```

If you need anything else, you may visit https://simpleicons.org/ and download the required icons.
